OHVALE GP-5: THE PRODUCT RANGE EXPANDS WITH A NEW MODEL

At Ohvale, every new motorcycle has always been born from a vision before becoming a project. **OHVALE GP-5** is the latest expression of this philosophy: a motorcycle created to write another important chapter in Ohvale's history.

Making motorcycling an accessible discipline for everyone, offering every rider a motorcycle capable of enhancing the pleasure of riding, improving their skills and allowing them to fully experience the world of racing, has always been one of the principles guiding every Ohvale project.

Over the years, we have developed motorcycles designed to meet the needs of enthusiasts, **from beginners to the most experienced riders**, offering high-performance, high-quality machines with an unmistakable **racing spirit**. At the same time, supporting young riders from their very first steps through to their debut in international and world championships represents the vision that continues to guide the development of our product range.

Ohvale has built a **unique ecosystem** dedicated to rider development and the pleasure of riding on track. Until now, the range has consisted of the OHVALE GP-0, GP-2 and GP-7. Today, Ohvale continues its evolution with a new addition, which has been under development for some time and is now ready to fit between the OHVALE GP-2 and OHVALE GP-7, making the transition to full-size wheels even more **natural and progressive**.

From this vision comes OHVALE GP-5: the latest addition to the Ohvale product range.

A motorcycle that is easy to ride, fun and designed to help riders reach their limits.

As intuitive as OHVALE GP-2. As high-performing as OHVALE GP-7.

Featuring **15-inch wheels**, an aluminium perimeter frame, a **250cc four-stroke** single-cylinder engine, fully adjustable OHRACING forks and a complete Brembo braking system with **dual front discs**, OHVALE GP-5 aims to set a new benchmark in the international motorcycle landscape, combining **performance, build quality and uncompromising riding enjoyment**. OHVALE GP-5 will be available with two different engine options, the HONDA CRF250R and ZS RR250, each of which can be equipped with two different ECUs: one featuring a race map and one featuring a restricted map.

OHVALE GP-5 has been developed to offer every rider the **ideal tool** to train, improve their performance and challenge themselves across an even wider range of circuits, from karting tracks to larger, full-size circuits. Thanks to its advanced chassis, innovative ergonomics and high-level components, it is also the perfect choice for **more experienced riders** looking for a powerful, complete and highly performing motorcycle, technically capable of allowing them to fully express their riding potential without compromise.

At the same time, remaining faithful to the Ohvale philosophy, GP-5 has been designed to support the development of young talents, introducing an additional and fundamental step within the brand's

rider development pathway. A motorcycle conceived for those looking for a focused technical platform that can support the rider throughout their progression and prepare them for the transition to higher categories.

Valerio Da Lio, CEO and Founder of Ohvale S.r.l.: *“Once again, Ohvale proves to be a pioneer in the world of two wheels, giving shape to an idea and responding to a real need within today’s motorcycling landscape. With OHVALE GP-5, we innovate and expand our offering with a motorcycle capable of interpreting the track in yet another new way, while remaining faithful to the philosophy that has always guided us and led us to become a leader in our segment. OHVALE GP-5 is innovation. OHVALE GP-5 is research. OHVALE GP-5 is pure racing.”*
